

## Year 5 Violet Spring 2: Where Did My School Dinner Start?

### Sticky Knowledge

Mammals give birth to live young, they look like their parent and the female provides milk for their young.

Amphibians usually lay eggs in water. Their young go through different forms before looking like an adult. There is no parental care.

Insects usually hatch from eggs. Some grow into adults but most go through metamorphosis.

Birds lay eggs and young hatch from them. They grow into adults and after hatching they are cared for by their parents.

Seasonal food is the time of year when food is at its best, in terms of flavour or harvest. Many foods are available all year, as they are imported from other countries. When local seasonal food is available it tends to be fresher and cheaper - there has been less travel/storage from farm to fork

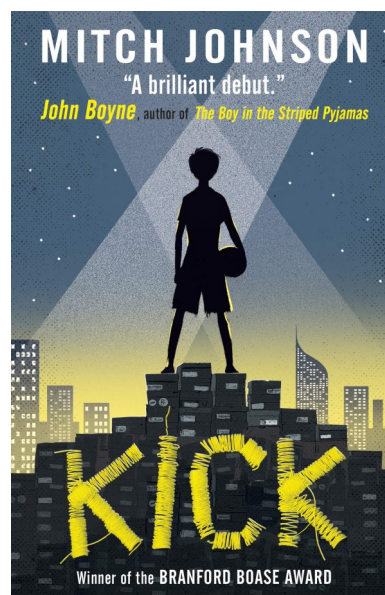

The global supply chain maps the different places a product and its parts come from, and travel to, on its way to the consumer (the person who is buying the product).

Foods are usually harvested when they are at their peak and typically have the most flavour and nutrients, so the food tends to be tastier, healthier and better for the environment.

The UK trades a lot of goods and services. Some of the goods the UK exports are: scrap iron, whisky, tartan kilts, medicines, aircraft parts, cars, computers, oil and gas. Some of the goods the UK imports are: coffee beans, bananas, medicines, aircraft parts, cars, computers, oil and gas.

### Key Text

### Topic Vocabulary

Behaviourist	Someone who studies animal behaviour: how they learn from their environment rather than emotions or feelings
Naturalist	An expert in, or a student of, natural history
Seed dispersal	The way seeds get from their parent plant to a new place
Asexual reproduction	Offspring obtain all of their information from one parent
Pollination	The transference of pollen to a flower, or plant, to allow fertilisation.
Life cycle	The series of changes that a animal or plant goes through from the beginning to the end of its life.
Germination	The development of a plant from a seed or spore after a period of dormancy
Metamorphosis	A major change from one form to another in the life cycle of some animals when they change from young to an adult
Trade	Buying and selling goods and services
Import	Goods or services purchased from one country and bought into the UK
Export	Goods and services made in the UK and sold to another country.
